2012-2013: Stabilizing After the Storm

During FY12-13 the Missouri Kidney Program patients, staff and the kidney community were adjusting to the severe downsizing that occurred in May of 2011. We spent most of this year with a deer-in-headlight freeze, wondering when and where the next budget cut would occur. Somehow we eventually adjusted to our marginal status, and survived the year.

However, we did feel and hear the patient and social workers concerns about the newly reduced MoKP benefits. In addition, the continued changes with MO Healthnet Spend Down policies resulted in a negative impact on our patients and providers. Many hours were spent in Jeff City, advocating for the needs of the low-income chronic kidney patient. We had a solid letter-writing campaign, great turnout at the Kidney Day at the Capitol on March 28, 2013, and our voices were heard.

I am pleased to say MoKP is facing a brighter future in FY2013-14, even with a small state budget increase. We have also been recently awarded 2 grants, so with the busy implementation of these new projects, the FY2012-13 Annual Report will only be a short summary. Please contact me if more details are needed.

Respectfully,

Leanne Peace, MSW, MHA
Director
